

Download Adhd Caring For Children With Adhd A Resource Toolkit For Clinicians

It is normal for children and youth to experience various types of emotional distress as they develop and mature. For example, it is common for children to experience anxiety about school, or youth to experience short periods of depression that are transient in nature. Click to Enlarge Most youth are healthy, physically and emotionally, yet one in every four to five youth in the general population meet criteria for a lifetime mental disorder that is associated with severe role impairment and/or distress (11.2 percent with mood disorders, 8.3 percent with anxiety disorders, and 9.6 percent behavior disorders). 1 A national and international literature review ...“Pediatric Care Online is a point-of-care resource for clinicians in pediatrics. For use in clinical settings, it provides quick access to evidence-based information to aid in diagnosis and treatment, and addresses the importance of health literacy of patients and families.
