Titled Part 107, these new regulations effectively create a new drone certification process that covers the majority of low-risk, commercial sUAS flight operations.. That's great, but what does Part 107 say about becoming a certified ...There are different U.S. federal agencies which have jurisdiction to regulate drones in some way such as the National Transportation and Safety Board and the Department of Transportation. If things couldn't be complicated enough, states agencies have created drone regulations. The regulation either apply to aircraft generally (manned and unmanned) or drones specifically. An unmanned aerial vehicle (UAV), commonly known as a drone, is an aircraft without a human pilot onboard. UAVs are a component of an unmanned aircraft system (UAS); which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by ...
