The goal of science is to understand the natural world through systematic study. Scientific knowledge is based on evidence and logic. Scientists gain knowledge through scientific investigations. A scientific investigation is a plan for asking questions and testing possible answers.

Introduction to Biology. Biology is the study of living things. It encompasses the cellular basis of living things, the energy metabolism that underlies the activities of life, and the genetic basis for inheritance in organisms. Biology also includes the study of evolutionary relationships among organisms and the diversity of life on Earth.
